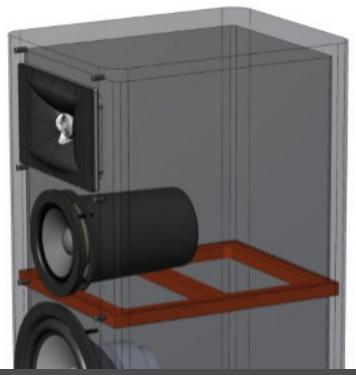
STUDIO 2 LOUDSPEAKERS

The New Generation of JBL Loudspeakers



The Latest in a Historic Line of Award-Winning JBL Loudspeakers.

JBL has spent the last 67 years delivering audio as it was meant to be heard. This longstanding legacy of providing unrivaled sound continues with the introduction of JBL's Studio 2 family of loudspeakers. The all-new lineup includes five full-range loudspeakers in a choice of three floorstanding or two bookshelf models complemented with multiple center, surround and subwoofer options, providing for flexible solutions from 2.0-channel music configurations all the way to advanced 9.2-channel home theater surround systems. The Studio 2 series provides astounding imaging, natural balance and remarkable high-frequency detail via High Definition Imaging (HDI) horn technology derived directly from JBL's Professional M2 Master Reference studio monitor. This patented technology combined with computer-optimized drivers, rigidly-braced enclosures and Slipstream rear-firing ports provides a lifelike, 3D soundstage backed by deep, powerful bass. This meticulous approach to design and detail was also used to create sophisticated and sleek cabinetry. Soft-rounded edges are complemented by elegant gloss black top panels, luxurious finishes, and the lack of visible fasteners on the front or side surfaces.

- Ten new models for flexible system configurations
- The perfect sound solution for every need
- High Definition Imaging (HDI) horn design derived directly from the JBL Professional M2 Master Reference Monitor
- Computer-optimized driver positioning and crossover network integration
- Proven acoustic superiority through rigorous testing and real-world evaluation
- Elegant gloss black top panels and luxurious soft-touch painted surfaces
- Solid cabinet construction with soft-rounded edges and no visible fasteners
- Available in two attractive finishes: Black and Espresso Woodgrain
